

Yell and Tell

Even if you stick to all the safety rules there might come a time when you feel very scared or very nervous about a stranger who is trying to approach you or talk to you.

If this happens **STAY CALM !**

Increase your distance from them by taking 4 big steps backwards then quickly look for a safe escape route.

If the person tries to approach you again or if they ask you to go with them then scream "**NO!**" and run as fast as possible to a safe place.

Scream and shout as loudly as possible when you are running to draw attention to yourself.

Find a trusted adult or Safe Stranger **IMMEDIATELY** and tell them what happened, where it happened and what the person said. Try to describe the person and any vehicle too.
